

COERVER skills are a must for the player who is serious about soccer. The goals each camp strives for are to:

- Develop skilled, confident, and creative players.
- Make the game fun to practice and play.
- Teach good sportsmanship and respect for all.
- Value winning but not more than character and performance.

COERVER believes that team systems and tactics are important, but they cannot fully compensate for poor control, inaccurate passing or other technical weaknesses. Ultimately, team organization is only as effective as the individual players in it. The COERVER philosophy is based on the premise that the game consists of sequences of play between 2, 3 and sometimes 4 players, in various parts of the field, and that a team's success is determined by player performances in these exchanges. Consequently, COERVER coaching focuses on improving individual and small group play especially in the formative years.

Each camp will work on the implementation of Ball Mastery skills consisting of repetitive ball control exercises using both feet; Receiving and Passing with an emphasis on the improvement of first touch, and to encourage accurate and creative passing; 1 v 1 Moves that teach game-winning individual moves and how to create space against packed defenses; Speed; Finishing; and Group Attacks that improve small group play with an emphasis on Fast Break Attacks.
